

Eureka County School District Distance Learning Program 20-21

Goal:

Eureka County School District is committed to providing all students with an equitable and high-quality education throughout the Covid 19 Pandemic. Ensuring that the academic and social emotional needs of our students are met is our top priority. The Eureka County School District Distance Learning Plan and the District Re-Opening Plan will comply with the most recent guidance from the state's Emergency Declaration.

Overview:

Eureka County School District has not had any formal distance learning plan or platform in the past. We will be implementing the Canvas LMS platform provided by the state. As this is a new process for us in Eureka, staff will undergo professional development in order to ensure effective use of the system. Due to the small nature of our school district, maintaining less than 50% of each room's capacity can be met by utilizing additional spaces we have available throughout the district. We anticipate that we will be able to bring all students on campus each day. Alternative days or am/pm sessions would only be necessary if the state guidelines move to below 50% capacity for room occupancy. Therefore, our plan will be created to accommodate students on campus and provide distance learning for students that must be quarantined and are unable to attend in person. If the Pandemic worsens and it is determined to be unsafe to bring students on campus, while maintaining strict social distancing guidelines, then all students will participate in distance learning through Canvas. Students without access to technology will be provided a technology device for use while at home. Students without access to WiFi will be provided paper packets.

Educators will ensure the appropriate modifications and accommodations for students with Individual Education Plans, 504s, and English learners will be provided. Team meetings will be conducted as needed to ensure the instructional needs are met for all students. Students will receive access to the nutrition services to which they are entitled in both the hybrid and distance learning models. Parents will receive weekly correspondence from their students' schools pertaining to the distance learning. Eureka County School District will be assessing technology needs across the district no later than October 1st. A plan and cost estimate to provide devices and internet access to all students will be submitted to Nevada Department of Education no later than December 31st.

Distance Education:

The Distance Education Path Forward for Eureka County School District, which includes both the hybrid and the total distance education options, is intended to be used if:

- a student cannot return to the school setting because of health reasons,
- a student or group of students are quarantined on the advice of local public health officials,
- a hybrid learning model is necessary to accommodate social distancing requirements while providing instruction to all students,
- a school-wide or district-wide closure is ordered,
- we are required to transition between in-person instruction, full-time distance education, and hybrid learning models, as necessitated by public health conditions and/or student health needs
